

SATYA PRAKASH

Full Stack Developer (MERN | Next.js | TypeScript) — API Integrations, Automation, CRM & Conversational AI Systems
Bangalore, India | +91-8678002242 | satyaprakash121122@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Developer with 1+ year of production experience in MERN, Next.js, and TypeScript, specializing in conversational/CRM automation (WhatsApp, Twilio, Zoho CRM, Brevo) and AI-powered features (Gemini API chat assistants, AI image generation, AI-enhanced search). Comfortable owning end-to-end delivery — API design, third-party integrations, and cloud deployment (Docker, AWS, Render, Vercel, CI/CD).

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), TypeScript

Frontend: React.js, Next.js, TypeScript, SSR, HTML5, CSS3, Responsive UI

Backend: Node.js, Express.js, Spring Boot, REST APIs, API Integration

Auth & Real-Time: JWT Authentication, Role-Based Access Control (RBAC), Socket.IO, Real-Time Communication

Database: MongoDB (schema design, indexing & aggregation)

AI / LLM Integration: Gemini API, LLM Integration, Prompt Engineering, AI Image Generation, AI-Powered Search

Conversational, CRM & Automation: WhatsApp Business Cloud API (Meta), Twilio (SMS/Voice/OTP), Zoho CRM, Firebase FCM, Brevo Email/SMS Automation, Facebook Lead Forms, Click-to-WhatsApp Ads (CTWA), Make.com, Webhooks, API-to-API Integrations

CMS & Website Integration: WordPress, FluentCRM, Website/Event Tracking

AI-Assisted Development: ChatGPT, Claude, Cursor, OpenAI Codex, Antigravity, Prompt Engineering

Payments: Razorpay Payment Gateway (subscriptions, automation)

Cloud & DevOps: AWS (EC2, S3), Docker, Docker Compose, CI/CD Pipelines (GitHub Actions), Render, Vercel, Git, GitHub

Tools: Postman, VS Code

WORK EXPERIENCE

Full Stack Developer

Kods Technologies Pvt. Ltd, Bangalore, India | Sep 2025 – Present

- Built and maintained 5+ full-stack MERN applications for real-world client projects, introducing reusable component architecture that cut delivery time by 25%.
- Implemented Firebase Cloud Messaging (FCM) for real-time push notifications to 800+ web and mobile users, and integrated WhatsApp Business Cloud API (Meta) and Twilio (OTP, SMS, voice) to power automated customer notifications and support conversations.
- Integrated Brevo (formerly Sendinblue) for transactional email/SMS automation and Razorpay payments, processing 500+ monthly transactions with zero payment failures alongside automated subscription renewals.
- Designed and optimized MongoDB schemas and indexing (35% faster queries), and built advanced pagination, filtering, and search that reduced average API response time by 40%.
- Deployed applications via Docker on Render and Vercel with GitHub Actions CI/CD pipelines, achieving 99.9% uptime.
- Used ChatGPT, Claude, and Cursor for AI-assisted coding, debugging, and documentation, applying prompt engineering to accelerate feature development and improve code quality.
- Collaborated in an Agile/Scrum team of 6 and partnered with 3 frontend/Flutter developers on API design, delivering 100% of sprint tasks on schedule and cutting cross-team bugs by 30%.

PROJECTS

Activeline – ISP Management System

MERN Stack, Razorpay, Firebase FCM, Brevo, Docker, Render

- Architected a full-stack ISP management system with an admin panel and user app supporting 200+ subscribers, covering billing, plan management, and data usage tracking — end-to-end ownership from requirements to deployment.

- Integrated Razorpay processing 300+ monthly payments and Firebase FCM delivering real-time notifications to 200+ users.
- Added Brevo email/SMS automation for billing alerts and plan renewals, significantly reducing support queries.
- Implemented secure JWT authentication and optimized pagination, reducing data load time by 45%; deployed via Docker on Render.

JSTcliq – Service & Product Platform

React.js, Node.js, MongoDB, Twilio, WhatsApp Cloud API, Gemini API, Vercel

- Developed a full-stack marketplace for 500+ users with product/service management allowing both admin and users to add, sell, and buy products or services from each other, along with authentication, order management, and profile features, increasing session time by 30%.
- Built an in-app AI chat assistant (ChatGPT-style conversational interface) using the Gemini API, allowing customers to ask product questions and track orders through natural conversation instead of manual navigation.
- Added AI-powered image generation to the admin panel so admins can generate product images directly while listing a product, instead of sourcing/uploading external photos; shipped the same image-generation capability to the vendor app for vendor-side listings.
- Integrated AI into the platform's search flow to power more relevant, AI-assisted product search results using the Gemini API.
- Built automated conversational touchpoints: Twilio OTP-based authentication and WhatsApp Meta API for order-status notifications and customer support automation.
- Designed fully responsive UI across 10+ product and service category pages, achieving a consistent cross-device experience.
- Built REST APIs with search, filtering, and pagination; deployed via CI/CD pipeline on Vercel and Render.

Synkor

WordPress, FluentCRM, Meta WhatsApp API, Facebook Lead Forms

- Integrated WordPress with FluentCRM and configured Facebook Lead Forms for automated lead capture and management.
- Built WhatsApp/Meta and marketing automation workflows to support customer engagement.

Wyred

Meta WhatsApp Business API, Zoho CRM, REST APIs

- Delivered Meta WhatsApp Business API integration with Zoho CRM for customer communication, lead tracking, and automation.
- Handled API integration, testing, and troubleshooting for WhatsApp workflows.

EDUCATION

B.Tech – Computer Science & Engineering, CGPA: 7.65 / 10.0 2020 – 2024

Future Institute of Engineering & Management, Sonarpur, Kolkata, West Bengal

Higher Secondary (Science, 10+2) 2018 – 2020

Vishunpur High School, Vishunpur, Ranipur, Nalanda, Bihar

CERTIFICATIONS

- **5-Star Java — HackerRank:** Achieved a 5-Star Java rating on HackerRank and ranked among the top 5,000 participants in CodeChef competitive programming contests (2020).
